The best software to assign homework to students/employees and conduct exams at schools, colleges, universities and companies

VirtualXPro

The demand of the educational world is rapidly changing with tech-supported educational content and online learning has become the need of the time. VirtualX Pro could be the apt partner for your examination and homework needs. The examination setting and evaluation mechanism of VirtualX Pro will bring in a more efficient system in your organisation. The great thing about VirtualX Pro is that it is backed up by a global software company PIT Solutions Pvt Ltd that is in business since 2000. PIT Solutions has clients across the world and are providing software & IT services for 20+ years. PIT Solutions make sure that VirtualX Pro will evolve with much more great features and be ready for future demands of the market. Our reliable customer support will ensure a hassle free experience for its users.

Services

We offer 3 kinds of services to our clients

Integration with other Learning Management Systems

VirtualX includes a REST API for accessing and modifying data externally from the main application, in your own programs and scripts. You can always check the API documentation for using it.

Hosting VirtualX

We offer hosted solutions for VirtualX. Our hosted solution enables you to smoothly run VirtualX Pro at your organisation without worrying about hosting related issues. For more details on pricing, please contact us.

Customizing VirtualX

Although we are constantly enhancing VirtualX, your organization may have specific needs. In such cases, we could customize VirtualX specifically for your organization. To know more about how we can do this service for you, please contact us.
